

What is claimed is:

1. A method for conducting at least one convention, by facilitating the exchange between at least one meeting planner client and at least one attendee client comprising the steps of:

5 a. receiving, from the at least one meeting planner client, and electronically storing at a central website, convention content information for a plurality of conventions;

b. receiving at the central website from the at least one attendee client a selection for convention content information of one convention from the plurality of conventions; and

10 c. releasing from the central website to the at least one attendee client the selected convention content information.

2. The method according to claim 1 wherein the at least one meeting planner client is a plurality of meeting planner clients.

3. The method according to claim 1 wherein the at least one attendee client is a plurality of attendee clients.

4. The method according to claim 1 wherein the convention content information is cyber-based.

5. The method according to claim 1 wherein the convention content information is one of cyber-based and venue-based.

6. The method according to claim 1 further comprising the step of storing in a relational database cross-referencing fields from the meeting planner client to allow for the holding of an unlimited number of conventions.

7. The method according to claim 1 further comprising, prior to step b), the steps of receiving at the central website a search request from the attendee client for certain convention content information and releasing to the attendee client information satisfying the search request.

8. The method according to claim 1 further comprising, prior to step c), the steps of receiving at the central website from the attendee client information necessary to register for the convention.

9. The method according to claim 1 further comprising the step of using attendee client information to alert attendee clients of future conventions that may be of interest to them.

10. The method according to claim 1 further comprising the step of receiving at the central website, from at least one exhibitor client, convention search, selection and registration information for at least one convention.

11. The method according to claim 10 wherein the at least one exhibitor client is a plurality of exhibitor clients.

12. The method according to claim 10 further comprising the step of storing cross-referencing fields from the convention content information in a relational database to allow an unlimited number of exhibitor clients.

13. The method according to claim 1 further comprising the step of receiving at the central website from the meeting planner client session content information.

14. The method according to claim 1 further comprising the steps of receiving at the central website a request for certain client session content information from the attendee client for and releasing to the attendee client information satisfying the search request.

15. The method according to claim 14 wherein the session content information is cyber-based.

16. The method according to claim 14 wherein the session content information is one of cyber-based and venue-based.

17. The method according to claim 14 further comprising the step of providing attendee client participation in the session.

18. The method according to claim 1 further comprising the step of receiving at the central website a search request from the attendee client for session information and releasing to the attendee client such information.

19. The method according to claim 1 further comprising the step of receiving at the central website from the attendee client information necessary to register for the session.

20. The method according to claim 1 further comprising the step of receiving at the central website from an exhibitor client exhibit content information including exhibit booth design and content.

21. The method according to claim 20 wherein the exhibit content information is cyber-based.

22. The method according to claim 20 wherein the exhibit content information is one of cyber-based and venue-based.

23. The method according to claim 20 further comprising the step of receiving at the central website from the attendee client an exhibit booth selection.

24. The method according to claim 23 further comprising the step of releasing to the attendee client exhibit booth design and content.

25. The method according to claim 23 further comprising the step of receiving at the central website from the attendee client information necessary to register for the exhibit booth selection.

26. The method according to claim 20 further comprising the step of receiving at the central website from the attendee client a search request for certain

exhibit booth design and content and releasing to the attendee client information satisfying the search.

27. The method according to claim 20 wherein the at least one exhibitor client is a plurality of exhibitor clients.

28. The method according to claim 1 further comprising the step of receiving at the central website from the meeting planner paper presentation content information.

29. The method according to claim 28 wherein the paper presentation content information is cyber-based.

30. The method according to claim 28 wherein the paper presentation content information is one of either cyber-based or venue-based.

31. The method according to claim 28 further comprising the step of releasing to the attendee client paper presentation content information.

32. The method according to claim 1 further comprising the step of receiving at the central website from the meeting planner meeting proceedings content information.

33. The method according to claim 32 wherein the meeting proceedings content information is cyber-based.

34. The method according to claim 32 wherein the meeting proceedings content information is one of cyber-based and venue-based.

35. The method according to claim 32 further comprising the step of releasing to the attendee client meeting proceedings content information.

36. The method according to claim 1 further comprising the step of receiving at the central website from the meeting planner cyber broadcast content information.

37. The method according to claim 36 further comprising the step of releasing to the attendee client cyber broadcast content information.

38. The method according to claim 1 wherein a plurality of conventions are facilitated from the central website.

39. A method for conducting at least one convention, by facilitating the exchange between at least one meeting planner client and at least one attendee client comprising the steps of:

5 a) receiving, from the at least one meeting planner client, and electronically storing at a central website, convention content information for a plurality of conventions;

b) receiving at the central website from the at least one attendee client a selection for convention content information of one convention from the plurality of conventions;

10 c) receiving at the central website from the attendee client information necessary to register for the convention; and

d) releasing from the central website to the at least one attendee client the selected convention content information.

40. A system for conducting at least one convention, by facilitating the exchange between at least one meeting planner client and at least one attendee client comprising:

5 a. means for receiving, from the at least one meeting planner client, and means for electronically storing at a central website, convention content information for a plurality of conventions;

b. means for receiving at the central website from the at least one attendee client a selection for convention content information of one convention from the plurality of conventions; and

10 c. means for releasing from the central website to the at least one attendee client the selected convention content information.

41. The system according to claim 40 further comprising means for receiving at the central website, from at least one exhibitor client, convention search, selection and registration information for at least one convention.

42. The system according to claim 40 further comprising means for receiving at the central website from an exhibitor client exhibit content information including exhibit booth design and content.

43. A method for conducting at least one convention, by facilitating the exchange between at least one administrator and at least one attendee client comprising the steps of:

5 a. receiving, from the at least one administrator, and electronically storing at a central website, convention content information for a plurality of conventions;

b. receiving at the central website from the at least one attendee client a selection for convention content information of one convention from the plurality of conventions; and

10 c. releasing from the central website to the at least one attendee client the selected convention content information.

44. The method according to claim 43 wherein the at least one administrator is a meeting planner client.

45. The method according to claim 44 wherein the at least one meeting planner client is a plurality of meeting planner clients.

46. The method according to claim 43 wherein the at least one attendee client is a plurality of attendee clients.

47. The method according to claim 43 wherein the convention content information is cyber-based.

48. The method according to claim 43 wherein the convention content information is one of cyber-based and venue-based.

49. The method according to claim 43 further comprising the step of storing in a relational database cross-referencing fields from the administrator to allow for the holding of an unlimited number of conventions.

50. The method according to claim 43 further comprising, prior to step b, the steps of receiving at the central website a search request from the attendee client for certain convention content information and releasing to the attendee client information satisfying the search request.

51. The method according to claim 43 further comprising, prior to step c, the step of receiving at the central website from the attendee client information necessary to register for the convention.

52. The method according to claim 43 further comprising the step of using attendee client information to alert attendee clients of future conventions that may be of interest to them.

53. The method according to claim 43 further comprising the step of receiving at the central website, from at least one exhibitor client, convention search, selection and registration information for at least one convention.

54. The method according to claim 53 wherein the at least one exhibitor client is a plurality of exhibitor clients.

55. The method according to claim 53 further comprising the step of storing cross-referencing fields from the convention content information in a relational database to allow an unlimited number of exhibitor clients.

56. The method according to claim 43 further comprising the step of receiving at the central website from the administrator session content information.

57. The method according to claim 43 further comprising the steps of receiving at the central website a request for certain client session content information from the attendee client for and releasing to the attendee client information satisfying the search request.

58. The method according to claim 57 wherein the session content information is cyber-based.

59. The method according to claim 57 wherein the session content information is one of cyber-based and venue-based.

60. The method according to claim 57 further comprising the step of providing attendee client participation in the session.

61. The method according to claim 43 further comprising the step of receiving at the central website a search request from the attendee client for session information and releasing to the attendee client such information.

62. The method according to claim 43 further comprising the step of receiving at the central website from the attendee client information necessary to register for the session.

63. The method according to claim 43 further comprising the step of receiving at the central website from an exhibitor client exhibit content information including exhibit booth design and content.

64. The method according to claim 63 wherein the exhibit content information is cyber-based.

65. The method according to claim 63 wherein the exhibit content information is one of cyber-based and venue-based.

66. The method according to claim 63 further comprising the step of receiving at the central website from the attendee client an exhibit booth selection.

67. The method according to claim 66 further comprising the step of releasing to the attendee client exhibit booth design and content.

68. The method according to claim 66 further comprising the step of receiving at the central website from the attendee client information necessary to register for the exhibit booth selection.

69. The method according to claim 63 further comprising the step of receiving at the central website from the attendee client a search request for certain exhibit booth design and content and releasing to the attendee client information satisfying the search.

70. The method according to claim 63 wherein the at least one exhibitor client is a plurality of exhibitor clients.

71. The method according to claim 43 further comprising the step of receiving at the central website from the administrator paper presentation content information.

72. The method according to claim 71 wherein the paper presentation content information is cyber-based.

73. The method according to claim 71 wherein the paper presentation content information is one of cyber-based and venue-based.

74. The method according to claim 69 further comprising the step of releasing to the attendee client paper presentation content information.

75. The method according to claim 43 further comprising the step of receiving at the central website from the administrator meeting proceedings content information.

76. The method according to claim 75 wherein the meeting proceedings content information is cyber-based.

77. The method according to claim 75 wherein the meeting proceedings content information is one of cyber-based and venue-based.

78. The method according to claim 75 further comprising the step of releasing to the attendee client meeting proceedings content information.

79. The method according to claim 43 further comprising the step of receiving at the central website from the administrator cyber broadcast content information.

80. The method according to claim 79 further comprising the step of releasing to the attendee client cyber broadcast content information.

81. The method according to claim 43 wherein a plurality of conventions are facilitated from the central website.

82. A method for conducting at least one convention, by facilitating the exchange between at least one meeting planner client and at least one attendee client comprising the steps of:

- a. receiving, from the at least one meeting planner client, and  
5 electronically storing at a central website, convention content information for the at least one convention;
- b. receiving at the central website from the at least one attendee client a selection for convention content information of the at least one convention; and
- c. releasing from the central website to the at least one attendee client  
10 the selected convention content information.

83. The method according to claim 82 wherein the at least one meeting planner client is a plurality of meeting planner clients.

84. The method according to claim 82 wherein the at least one attendee client is a plurality of attendee clients.

85. The method according to claim 82 wherein the convention content information is cyber-based.

86. The method according to claim 82 wherein the convention content information is one of cyber-based and venue-based.

87. The method according to claim 82 further comprising the step of storing in a relational database cross-referencing fields from the meeting planner client to allow for the holding of an unlimited number of conventions.

88. The method according to claim 82 further comprising, prior to step b, the steps of receiving at the central website a search request from the attendee client for certain convention content information and releasing to the attendee client information satisfying the search request.

89. The method according to claim 82 further comprising, prior to step c, the step of receiving at the central website from the attendee client information necessary to register for the convention.

90. The method according to claim 82 further comprising the step of using attendee client information to alert attendee clients of future conventions that may be of interest to them.

91. The method according to claim 82 further comprising the step of receiving at the central website, from at least one exhibitor client, convention search, selection and registration information for at least one convention.

92. The method according to claim 91 wherein the at least one exhibitor client is a plurality of exhibitor clients.

93. The method according to claim 91 further comprising the step of storing cross-referencing fields from the convention content information in a relational database to allow an unlimited number of exhibitor clients.

94. The method according to claim 82 further comprising the step of receiving at the central website from the meeting planner client session content information.

95. The method according to claim 82 further comprising the steps of receiving at the central website a request for certain client session content information from the attendee client for and releasing to the attendee client information satisfying the search request.

96. The method according to claim 95 wherein the session content information is cyber-based.

97. The method according to claim 95 wherein the session content information is one of cyber-based and venue-based.

98. The method according to claim 95 further comprising the step of providing attendee client participation in the session.

99. The method according to claim 82 further comprising the step of receiving at the central website a search request from the attendee client for session information and releasing to the attendee client such information.

100. The method according to claim 82 further comprising the step of receiving at the central website from the attendee client information necessary to register for the session.

101. The method according to claim 82 further comprising the step of receiving at the central website from an exhibitor client exhibit content information including exhibit booth design and content.

102. The method according to claim 101 wherein the exhibit content information is cyber-based.

103. The method according to claim 101 wherein the exhibit content information is one of cyber-based and venue-based.

104. The method according to claim 101 further comprising the step of receiving at the central website from the attendee client an exhibit booth selection.

105. The method according to claim 104 further comprising the step of releasing to the attendee client exhibit booth design and content.

106. The method according to claim 104 further comprising the step of receiving at the central website from the attendee client information necessary to register for the exhibit booth selection.

107. The method according to claim 101 further comprising the step of receiving at the central website from the attendee client a search request for certain exhibit booth design and content and releasing to the attendee client information satisfying the search.

108. The method according to claim 101 wherein the at least one exhibitor client is a plurality of exhibitor clients.

109. The method according to claim 82 further comprising the step of receiving at the central website from the meeting planner paper presentation content information.

110. The method according to claim 109 wherein the paper presentation content information is cyber-based.

111. The method according to claim 109 wherein the paper presentation content information is one of cyber-based and venue-based.

112. The method according to claim 109 further comprising the step of releasing to the attendee client paper presentation content information.

113. The method according to claim 82 further comprising the step of receiving at the central website from the meeting planner meeting proceedings content information.

114. The method according to claim 113 wherein the meeting proceedings content information is cyber-based.

115. The method according to claim 113 wherein the meeting proceedings content information is one of cyber-based and venue-based.

116. The method according to claim 113 further comprising the step of releasing to the attendee client meeting proceedings content information.

117. The method according to claim 82 further comprising the step of receiving at the central website from the meeting planner cyber broadcast content information.

118. The method according to claim 117 further comprising the step of releasing to the attendee client cyber broadcast content information.

119. The method according to claim 82 wherein a plurality of conventions are facilitated from the central website.

120. A method for conducting at least one convention, by facilitating the exchange between at least one administrator and at least one attendee client comprising the steps of:

- a. receiving, from the at least one administrator, and electronically storing at a central website, convention content information for the at least one convention;
- b. receiving at the central website from the at least one attendee client a selection for convention content information of the at least one convention; and
- c. releasing from the central website to the at least one attendee client the selected convention content information.

121. The method according to claim 120 wherein the at least one administrator is a meeting planner client.

122. The method according to claim 121 wherein the at least one meeting planner client is a plurality of meeting planner clients.

123. The method according to claim 120 wherein the at least one attendee client is a plurality of attendee clients.

124. The method according to claim 120 wherein the convention content information is cyber-based.

125. The method according to claim 120 wherein the convention content information is one of cyber-based and venue-based.

126. The method according to claim 120 further comprising the step of storing in a relational database cross-referencing fields from the administrator to allow for the holding of an unlimited number of conventions.

127. The method according to claim 120 further comprising, prior to step b, the steps of receiving at the central website a search request from the attendee client for certain convention content information and releasing to the attendee client information satisfying the search request.

128. The method according to claim 120 further comprising, prior to step c, the steps of receiving at the central website from the attendee client information necessary to register for the convention.

129. The method according to claim 120 further comprising the step of using attendee client information to alert attendee clients of future conventions that may be of interest to them.

130. The method according to claim 120 further comprising the step of receiving at the central website, from at least one exhibitor client, convention search, selection and registration information for at least one convention.

131. The method according to claim 130 wherein the at least one exhibitor client is a plurality of exhibitor clients.

132. The method according to claim 130 further comprising the step of storing cross-referencing fields from the convention content information in a relational database to allow an unlimited number of exhibitor clients.

133. The method according to claim 120 further comprising the step of receiving at the central website from the administrator client session content information.

134. The method according to claim 120 further comprising the steps of receiving at the central website a request for certain client session content information from the attendee client for and releasing to the attendee client information satisfying the search request.

135. The method according to claim 134 wherein the session content information is cyber-based.

136. The method according to claim 134 wherein the session content information is one of cyber-based and venue-based.

137. The method according to claim 134 further comprising the step of providing attendee client participation in the session.

138. The method according to claim 120 further comprising the step of receiving at the central website a search request from the attendee client for session information and releasing to the attendee client such information.

139. The method according to claim 120 further comprising the step of receiving at the central website from the attendee client information necessary to register for the session.

140. The method according to claim 120 further comprising the step of receiving at the central website from an exhibitor client exhibit content information including exhibit booth design and content.

141. The method according to claim 140 wherein the exhibit content information is cyber-based.

142. The method according to claim 140 wherein the exhibit content information is one of cyber-based and venue-based.

143. The method according to claim 140 further comprising the step of receiving at the central website from the attendee client an exhibit booth selection.

144. The method according to claim 143 further comprising the step of releasing to the attendee client exhibit booth design and content.

145. The method according to claim 143 further comprising the step of receiving at the central website from the attendee client information necessary to register for the exhibit booth selection.

146. The method according to claim 140 further comprising the steps of receiving at the central website from the attendee client a search request for certain exhibit booth design and content and releasing to the attendee client information satisfying the search.

147. The method according to claim 140 wherein the at least one exhibitor client is a plurality of exhibitor clients.

148. The method according to claim 120 further comprising the step of receiving at the central website from the administrator paper presentation content information.

149. The method according to claim 148 wherein the paper presentation content information is cyber-based.

150. The method according to claim 148 wherein the paper presentation content information is one of cyber-based and venue-based.

151. The method according to claim 148 further comprising the step of releasing to the attendee client paper presentation content information.

152. The method according to claim 120 further comprising the step of receiving at the central website from the administrator meeting proceedings content information.

153. The method according to claim 152 wherein the meeting proceedings content information is cyber-based.

154. The method according to claim 152 wherein the meeting proceedings content information is one of cyber-based and venue-based.

155. The method according to claim 152 further comprising the step of releasing to the attendee client meeting proceedings content information.

156. The method according to claim 120 further comprising the step of receiving at the central website from the administrator cyber broadcast content information.

157. The method according to claim 156 further comprising the step of releasing to the attendee client cyber broadcast content information.

158. The method according to claim 120 wherein a plurality of conventions are facilitated from the central website.
